Dear Mr. Rokich:

Re: Conveyor Corridor Seed List, UCD Modernization Project,
M/035/002, Salt Lake County, Utah

Thank you for the very interesting and informative tour you gave myself and other DOGM personnel last Friday, June 15. Your efforts and Kennecott's in the reclamation of some very difficult sites, are impressive.

You indicated to me, last week, that you were interested in changing some of the species on the post-construction seed mixture that would be used on the embankments of the ore conveyor corridor (UCD Modernization Project). I have looked at the new list you provided me (letter from Plummer Plant & Seed Co, dated 6-23-88) and see no problem with using this list of species, instead of the list specified in the UCD Modernization Project Plan.

I support your idea of turning this corridor into a wild life barrier of sorts by providing a vegetated food and cover source along the corridor; and thus limiting animal migration across busy motorways.

Best of luck in your reclamation endeavors.

Sincerely,

Holland Shepherd
Soils Reclamation Specialist
